

JACK'S MAGIC "THE STUFF"

Jack's Magic "The Stuff" should be used at start-up and on a weekly basis to prevent metal staining or discoloration. If you have already experienced staining or discoloration of your pool or water- you should go to the [Stain Remover](#) section under Specialty Chemicals.

"The Pink Stuff" is a professional strength, general purpose sequestering agent. "The Pink Stuff" is the most recommended start-up product in the swimming pool industry.

Dosage: Initially, add one quart (32oz.) per 10,000 gallons of pool water then 6-8oz. per 10,000 gallons of water per week for maintenance.

"The Blue Stuff" does everything "The Pink Stuff" does and more. "The Blue Stuff"'s proprietary blend actually removes copper from the water. "The Blue Stuff" is also very stable in higher chlorine levels and can be used in many fountain and water feature applications.

Dosage: Initially, add one quart (32oz.) per 10,000 gallons of pool water then 6-8oz. per 10,000 gallons of water per week for maintenance.

"The Purple Stuff" is the latest addition to the Jack's Magic stain prevention family. Traditional sequestering agents do not work well in high salt levels but "The Purple Stuff" was designed specifically for salt water pools and those with high (above 1200ppm) TDS. "The Purple Stuff" also keeps silica in solution while greatly reducing the incidence of cell fouling (scaling) in chlorine generators.

Dosage: Initially, add one quart (32oz.) per 10,000 gallons of pool water then 6-8oz. per 10,000 gallons of water per week for maintenance.
